SUMMARY

Full-stack Software Engineer with 5+ years of experience building cross-platform mobile, web, and desktop applications and, more recently, production AI/LLM-powered systems. Deep expertise in Flutter and Dart, with additional cross-platform mobile experience in Expo and React Native, desktop development with Electron, and hands-on backend experience in Node.js, Nest.js, Express, and Next.js. Over the past two years I have shifted into building AI-integrated products – RAG pipelines, multi-provider LLM orchestration (Claude, OpenAI, ElevenLabs), and workflow automation platforms using n8n – alongside continued Flutter/mobile delivery. I focus on scalable architecture, clean code, and shipping features end-to-end, from UI to database to third-party integrations. Known for mentoring developers, automating repetitive business workflows, and translating ambiguous requirements into working production systems.

AREAS OF EXPERTISE

- Flutter & Dart Development
- Full-Stack Development (Node.js, Nest.js, Express, Next.js)
- AI/LLM Integration & RAG Pipelines
- Scalable App & Backend Architecture
- Workflow Automation (n8n, App Script, Zapier, Go High Level)
- UI/UX Implementation & Responsive Design
- API Integration & Third-Party Services
- Cloud & Serverless (Firebase, Supabase, AWS)
- Database Management
- Payment & Subscription Systems (Stripe)
- Native iOS & Android Integrations
- Technical Leadership & Mentorship
- Agile & Scrum Methodologies

KEY ACHIEVEMENTS

- **Led Feature Development:** Spearheaded end-to-end delivery of complex mobile, web, and AI-powered features across multiple production applications.
- **Architected Scalable Solutions:** Designed modular Flutter, Nest.js, and Express architectures that improved code efficiency and reduced technical debt.
- **Built Production AI Systems:** Designed and shipped a Retrieval-Augmented Generation (RAG) pipeline and multi-provider AI orchestration layer (Claude, GPT-4o, ElevenLabs) with streaming responses and automatic provider failover.
- **Enterprise System Integration:** Integrated a React Native application with SAP ERP, supporting thousands of daily batch scans nationwide across a four-level org hierarchy.
- **Automation at Scale:** Designed and deployed 10+ business-process automations (n8n, App Script, Zapier, Go High Level), including a 1-minute lead response system and a daily lead-discovery pipeline delivering verified contacts before business hours.
- **Cross-Functional Collaboration:** Partnered with designers, QA engineers, and product managers to translate business objectives into production-quality applications.
- **Technical Mentorship:** Guided junior developers in Flutter architecture, backend patterns, and debugging techniques, while conducting peer code reviews.
- **Product Deployment & Maintenance:** Successfully published and maintained multiple production-grade applications on Google Play and the App Store with consistently positive user feedback.

EDUCATION

Bachelor of Computer Science Information Technology University (ITU) Intelligent Home Automation System with Dr. Suleman Mazhar.	2015 - 2019
F.Sc Pre-Engineering Government College University (GCU)	2013 - 2015
Matriculation Hashmat Memorial High School (HMS)	2011 - 2013

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer & AI Product Engineer / Team Lead <i>Techtiz — Township, Lahore</i>	2024 – Present
--	----------------

- **Team Leadership:** Led a development team, managed sprints via **Jira**, and tracked productivity through **Worktivity**.
- **AI Product – NebuFit** (Flutter, PostgreSQL/Supabase, Redis): Built a cross-platform AI fitness/health app covering computer-vision body analysis, AI-generated workout and nutrition plans, bloodwork report processing, and voice-based coaching. Designed a **RAG** system for contextual fitness/nutrition guidance, multi-provider AI orchestration (**Claude**, **GPT-4o**, **ElevenLabs**) with SSE streaming and failover, and full **Stripe** subscription/entitlement management.
- **Enterprise Platform – Orient Champions** (Nest.js, React Native, Expo, MongoDB, SAP RFC, AWS S3): Built a field-sales incentive platform used **nationwide by field agents across Pakistan**, architecting a Nest.js backend supporting **thousands of daily batch scans** with real-time **SAP ERP** sync via custom BAPIs across a **four-level organizational hierarchy** (National → Zone → Branch → FSM), with resilient offline queuing/reconciliation, JWT + Twilio OTP auth, and bulk Excel/CSV processing.
- **Creative OS** (Electron, React, Claude API, RAG, ChromaDB): Built a local-first AI desktop app for writers/filmmakers indexing Final Draft scripts, PDFs, and notes via RAG, with Claude-powered rewriting, semantic search, and an extensible **MCP** server architecture.
- **Mobile App Development:** Built **Aniflex** (Flutter fitness/gamification app), fully rebranded '**Exodus App**' (formerly Blue Sky), and developed '**Linked Golf**' (Flutter + Express + PubNub chat + Stripe + FCM), deployed to both stores.
- **Desktop & Web Platforms:** Fully built the '**UNITY**' Electron desktop app and its Next.js/Nest.js admin web portal – role-based access, dynamic server-driven layouts, credential manager, script-injected auto-fill, and real-time notifications via sockets.
- **FlutterFlow Templates:** Built two FlutterFlow templates – '**Kumquat – Talent Match**' and '**Foodii – Recipe Book**'.
- **Lead Response Automation** (n8n, Go High Level, Retell AI, Aloware, CloseBot): Built an automated lead response system for **United Global Vanline** that contacts new leads **within 1 minute** and places an **AI voice call within 2 minutes** of form submission, using Go High Level (Opportunities, Pipelines, Automations) and OpenAI-based call scoring/fraud detection. Also synced **The Ramirez Legal Group's** ClickUp case data to a live client dashboard via Zapier and Emergent Labs.
- **Data & Reporting Automation** (n8n, App Script, Apify, Nocodb, ZeroBounce, Clearout Phone): Built OCR-based document processing for bank statements ('**Capital Shack**'); a **daily** decision-maker lead-discovery pipeline ('**AGENTC**') delivering verified contacts **before business hours every day**; and a **Leads Management System** syncing campaign data to Google Data Studio.
- **Content & Outreach Automation** (n8n, App Script, OpenAI): Built a social-media post scheduling system generating platform-specific captions on a schedule, and an outreach email triage pipeline routing qualified leads to the sales team via Slack.
- **Web Development:** Rebuilt the Techtiz corporate site in **Astro** for performance/SEO, and built a native-element homepage in **Go High Level** for **ATTN Agency**.

- **Developed 'Houzi' App:** Created a real estate template app for the popular **Houzez WordPress theme**, used by over **53,000+** users globally. Achieved **500+ Envato sales**, a **4.84/5** rating, and **5K+ downloads** on Google Play Store.
- **Architecture & Scalability:** Implemented clean architecture and efficient state management using Bloc, ensuring high maintainability and smooth performance.
- **Cross-Platform Projects:** Delivered mobile apps (**Houzi**, **IPT Force**, **Linked Home**, **FSF-Ticket**), a desktop platform (**HouziBuilder**), and a WordPress plugin (**Houzi-Rest-API**) for custom API extensions, including OneSignal push, chat, and comments integrations.
- **Performance Optimization:** Enhanced app load times, reduced API latency, and improved UI responsiveness, resulting in smoother user interaction.
- **Collaboration:** Worked closely with designers, QA teams, and product owners to align on features and quality benchmarks across releases.
- **Mentorship & Quality Assurance:** Provided technical mentorship, reviewed pull requests, and upheld clean coding standards to maintain consistency across development teams.

RELEVANT EXPERIENCE

Learning Developer / Research Assistant

2015 – 2019

Information Technology University (ITU), Lahore

- **Final Year Project – Intelligent Home Automation System:** Collaborated in a four-member team to build a smart home automation system with a companion Android control app.
- **Mobile Application Development:** Early Android (Java/Kotlin) and iOS (Swift) projects (Weather App, BMI Calculator, Tic Tac Toe), building a foundation in native app life cycles.
- **Game Development:** Built 2D desktop/Android games (Road Fury, Space Battle, BattleCopter) in Unity, covering core game physics and interaction concepts.
- **Software Testing:** Applied black-box/white-box testing on an open-source Java project (TEAMMATES), building debugging and QA skills used in later professional work.

CERTIFICATIONS

- **Anthropic:** Claude Code in Action, Claude Code 101, Claude 101, Introduction to Agent Skills
- **n8n:** n8n Level 1

OTHER SKILLS AND TOOLS

- **Programming Languages:** Dart, Java, Kotlin, Swift, JavaScript, TypeScript, PHP, Python
- **Frameworks & Technologies:** Flutter, Electron, Node.js, Nest.js, Express, Next.js, FlutterFlow, Expo, React Native, Astro
- **AI/LLM:** Claude API / Anthropic, OpenAI GPT-4o, ElevenLabs, RAG, MCP (Model Context Protocol), ChromaDB
- **Databases:** PostgreSQL, Firebase Firestore, MongoDB, MySQL, Hive, SQLite, Redis
- **Cloud & Serverless:** Firebase (Auth, Analytics, Crashlytics), Supabase, Google Cloud Functions, AWS S3
- **Automation:** n8n, Zapier, Google Apps Script, AppSheet, Go High Level, Retell AI, Aloware, CloseBot, Apify
- **Integrations:** Stripe, Twilio, SAP RFC, PubNub, JWT, Hunter.io, ZeroBounce, Nocodb
- **Architecture & Patterns:** Clean Architecture, MVC, Singleton, Observer
- **Version Control & PM Tools:** Git, GitHub, SourceTree, Jira, Trello, Slack, Worktivity, ClickUp, Emergent Labs
- **IDEs & Development Tools:** Android Studio, Xcode, Cursor, Visual Studio Code, Postman, Unity 3D
